NOTES ON THE USE OF THIS MANUAL

Use of German language terminology: Wherever possible translation of the title of the offices has been made, however, where the German terminology appears obscure or there is no English equivalent, the German terminology has been retained. In some cases where an English translation appears to be inadequate the German terminology has been parenthesized following the English.

Use of the word "Chief": In many cases throughout this handbook the word "Chief" has been omitted because constant repetition of the word not only obscured the appearance of the page, but seemed unnecessary. In all cases, the name following the office title is the name of the chief of that office.

COUNCIL OF MINISTERS PRESIDUM (cont'd)

B. The following responsibilities are assigned to the listed Presidium members:

1. Questions of Nuclear Research
and Technology

Willi STOPH

2. All-German Questions

Dr. Hans LOCH

~~CONFIDENTIAL~~

4th GDR Cabinet Meeting on 9 Dec 54 Re: Criticism of GDR Government
Organs by Otto Grotewohl.

In the future it is planned to allow only those proposals to appear on the agenda of the Council which are of basic political and economic interest. The Minister Council must be set free from the duty of formal approval of proposals, which only leads to many ministers and state secretaries attempting to cause the Council to assume the responsibilities which are rightfully those of the minister or the state secretary himself. Each minister and state secretary must analyse each proposal which he wishes to bring before the Council of Ministers or its Presidium to determine if their decision on the proposal is really necessary. The Office of the Presidium of the Council of Ministers is charged with the examination of all proposals before they are included in the agendas. In the future the initiator of the proposal must include with the proposal an explanation of what laws, ordinances, or decisions previously passed apply to the proposal being submitted. The Office of the Presidium will work out the questions of the form of the proposal and its supporting documents so as to provide a proposal upon which decision can be readily rendered.

THE COUNCIL OF MINISTERS OF THE GDR

The regular participants and full members of the Council of Ministers are as follows:

- | | | |
|---|-----------------|-------|
| 1. <u>Minister President</u> | Otto GROTEWOHL | (SED) |

c. Scope of Responsibilities, as established in original
government order -

The Control Department is authorized to demand reports and data from the Control Offices of the Ministries and State Secretariats and to give them orders. Important ordinances of draft laws, which are to be submitted to the Council of Ministers, have to be checked by the Control Department, if they require factual checking. The Control Offices of the individual Ministries and State Secretariats must be immediately reorganized and, if necessary, increased in such a manner that they can properly cope with the control tasks transferred to them.

Central Governing Commission for the Curtailment of and Prevention of Production of New Unsaleable Goods - Also Disposition of Unsaleable Goods on Hand.

The Commission will meet every four weeks.

The chairman of the Commission has the duty to appear at least once every four months before the Presidium of the Council of Ministers concerning the overall development of the "unsaleable goods" (Ueberplanbestaende) situation and concerning the activities of the Commission. Where necessary he will make suggestions.

The Commission has the following tasks:

1. Initiating measures to get rid of unsaleable stocks in trade and production.

~~CONFIDENTIAL~~

OFFICE OF THE PRESIDUM OF THE COUNCIL OF MINISTERS (cont'd)

2. Initiating measures to get rid of the causes that produced this unsaleable stock and to see that it doesn't happen in the future.
3. Control of Commission to be formed in the Ministries and in the Districts and Kreise to prevent future production of unsaleable goods.

In order to carry out its duties the Commission can enlist the services of experts in the Ministries, enterprises, and other institutions.

COMMITTEE FOR GERMAN UNITY

The Committee for German Unity (Ausschuss fuer Deutsche Einheit), which is located at Berlin-Mitte, Friedrichstrasse 169/170 (Soviet Sector) telephone number 22 51 01, has taken the place of the "People's Election Committee" of the National Front in the propaganda effort of the GDR.

Source 3

At the commencement of employment clerical and administrative employees were informed that the purpose of the Committee for German Unity was the reunification of Germany. However, it would appear that the main function is the collation of political information on Western Germany. A newspaper archiv is maintained and newspapers are collected from throughout the world, but principally from Western Germany. Additional West German books and periodicals are regularly borrowed from the "Institut fuer Zeitgeschichte" in Berlin, Hessischestr.

STATE PLANNING COMMISSION (cont'd)

Work Circles Sponsored by ZAFT

ZAFT, subordinate to the State Planning Commission, appointed the following commission to work out the stipulations for the implementation of the government decree concerning the establishing of "Work Circles for Research and Technology:"

Head of ZAFT

Prof. Werner LANGE

Legal Advisor to the Head

Wolfgang GOEPELT

Chief, Main Department I

Dr. Alfred BAUMBACH

Chief, Main Department II

Herbert ROEHL

Chief, Finance Referate, Integral
Planning Department

(fnu) LASKE

With respect to "Work Circles" and work groups, ZAFT is now engaged in making extracts from its registry material concerning the "Work Circles." These extracts will be given to the heads of the "Work Circles." The extracts concern the official designation of the "Work Circle" in question, the responsible supervisory organization, data on the members of the "Work Circle" and their functions within it, data on liaison personnel to other "Work Circles," and the work groups structure of every "Work Circle." These extracts are different from the ZP4 file [REDACTED] 25X1A2g
Extracts from the ZP4 file listing information of cross sectional character on research projects, will probably be made available to the heads of the "Work Circles" in the near future, also.

[REDACTED] 25X1X6

The State Secretariat for Local Economy

The functionaries within the State Secretariat for Local Economy are criticized for "not fighting for the profitability of the local economy. They take these conditions to be natural, put up with them, and thus the conditions continue. It is not possible to get from this State Secretariat any integrated figures pertaining to local industry. If one desires such material he must turn to the Central Office for Statistics, to the State Planning Commission or to the Ministry for Finance...." In conclusion to this criticism GROTEWOHL states that the State Secretariat's "unplanned work, without control has had no economic success yet." - Otto GROTEWOHL on 17 Jan 55.

OFFICE FOR STANDARDIZATION

The Office for Standardization first came into existence as a Division (Abteilung) for Standardization, subordinate to ZAFT. Dr. Werner Lange, Chief of ZAFT, was interested in standardization work. At that time, Erwin Goepel was the chief of this Division. When Eberhard Arlt replaced Goepel, Lange gave up his supervisory interest in the Division. Arlt was subsequently able to develop this Division gradually into an independent office culminating in its being declared by law an independent agency of the State Planning Commission as of 1 Nov 54.

An enormous staff to run the Office for Standardization must be hired and trained before effective standardization work, all of which is to be centrally controlled, can begin. There are to be no independent standardization commissions studying specific problems, as is the case in the West German Standardization Commission. Instead, the East German commissions will be government-appointed to prepare standards as directed by the appointing government agency.

It is also planned to appoint standardization engineers in the various government-owned industrial enterprises. A ration is to be set up whereby one standardization engineer is to be used to a certain number of employees (actual number as yet unknown).

THE CHAMBER OF TECHNOLOGY

At the end of 1952 the Chamber of Technology suffered strong reverses because it had been unable to fulfill its mission - the bringing together of the "technical intelligentsia" and encouraging them to active political work. At the end of 1953 the Chamber gave up its professional work and only held lectures in an attempt to appear, at least on the outside, to be performing its given function. After the separation of Erwin ALEX from the organization the emphasis was again changed to doing professional work.

The "Chamber" attempted to make western contacts without success.

Their monies were cut in half at the beginning of 1953 by the SED CC. The result was a large cutback in personnel. In the middle of 1953 they were permitted one million East Marks more.

Source 1

New statutes of the Chamber of Technology, adopted at its first congress held in Berlin 3-4 December 1955, provided that it would be "a comprehensive organization of scientists, engineers, technicians, and such working people as combine to advance technical and economic progress in the GDR." At this time it was stated that the chamber had been recognized by the government as autonomous in August 1955.

25X1C8b

[REDACTED] the application for recognition as an official organization stated that under the proposed reorganization the number of professional groups (Fachverbaende) would be reduced through amalgamation from 15 to 10 or 12. At the same time, however, there would be some increase in the total number of employees.

The main function of the "Kammer der Technik" is to organize groups of engineers and other interested persons within Betriebe, for the purpose of holding meetings in order to discuss technical improvements in the field of industry concerned.

The "Kammer" has approximately 90,000 members within the GDR. Membership is highest in the Berlin, Karl-Marx-Stadt and Dresden areas owing to concentration of industry.

[REDACTED]

~~CONFIDENTIAL~~

~~CONFIDENTIAL~~

MINISTRY FOR AGRICULTURE AND FORESTRY (cont'd)

Central Department Inspection (Kontrolle) is responsible for checking on the implementation of resolutions within the Ministry.

Mass Political Work and Schooling (may be Central Department, Department or Main Administration).

Mechanization is a very important department re-established in 1954 directly under the Minister. Its main duties include a close cooperation with the institutes and with machine production for the purpose of obtaining practical types of agricultural machines.

Agricultural plans are developed within the Ministry and then sent to the State Planning Commission where the plans are processed exclusively on a political basis, i.e., it gives preference first to the LPGs and secondly to the VEGs. Compensation allocations of seed stock as against crops is not done according to quality of the crops, but on a political basis. Instructions regarding areas of cultivation are not issued according to the soil classification, but again on a political basis (for example, the senseless preference given Bezirk Neubrandenburg in the issuance of seed potatoes.) If the competent department chiefs voice any disagreement with changes made in the plans by the State Planning Commission, the Minister can take the differences up with the Council of Ministers. Usually, however, the end result is not in favor of the complainants.

25X1A6c

~~CONFIDENTIAL~~

MINISTRY FOR AGRICULTURE AND FORESTRY (cont'd)

MINISTRIES concerned with production and distribution are to have committees formed within them which are to be concerned with seeing that circumstances resulting in the production of unsaleable goods are abolished and that unsaleable goods already produced are disposed of. These committees are responsible to the Central Government Committee which is subordinate to the Presidium of the Council of Ministers. Its exact subordination within the Ministry is not known. In all probability it is not subordinate to anyone within the Ministry itself. The members are as follows:

1. A Deputy Minister
2. A Representative of the Planning Commission
3. A Representative of the Ministry of Finance
4. A Representative of the State Committee for Material Procurement
5. A Representative of the German "Notenbank"

MINISTRY OF CONSTRUCTION (cont'd)

MINISTRIES concerned with production and distribution are to have committees formed within them which are to be concerned with seeing that circumstances resulting in the production of unsaleable goods are abolished and that unsaleable goods already produced are disposed of. These committees are responsible to the Central Government Committee which is subordinate to the Presidium of the Council of Ministers. Its exact subordination within the Ministry is not known. In all probability it is not subordinate to anyone within the Ministry itself. The members are as follows:

1. A Deputy Minister
2. A Representative of the Planning Commission
3. A Representative of the Ministry of Finance
4. A Representative of the State Committee for Material Procurement
5. A Representative of the German "Notenbank"

Note: The Ministry for Culture was formally established by decree of the GDR Council of Ministers on 7 January 1954. At that time, Johannes R. BECHER was appointed to head the new ministry. Subsequent to this the GDR Gesetzblatt of 12 January contained the legal announcement of the new ministry. In this Gesetzblatt it was announced that the State Commission for Art Matters, the State Film Committee and the Department for Adult Education of the Ministry for Education were dissolved. A later report [REDACTED] states that the Office for Literature and Publishing Houses was also to be abolished.

OFFICE FOR LITERATURE AND PUBLISHING MATTERS

The Office for Literature and Publishing Matters is a central state organ of the government of the German Democratic Republic. It has the jurisdiction of a State Secretariat with independent jurisdiction.* It is responsible to the Volkskammer and the Council of Ministers. The office is headed by a chief and deputy chief appointed by the Council of Ministers. The advisory organ is the collegium of the Office for Literature and Publishing Matters.

This office has the duty of guaranteeing the systematic improvement and care of progressive (fortschrittlicher) literature on all subjects as well as the consequent improvement in the quality of the publishing houses' production. The office is responsible for seeing to it that the state plans in all areas of literature, publishing matters, and retailing of books is carried out. They review and give suggestions on all books and other printed items. In short this office controls what is printed, the printing houses, what foreign literature is allowed into the GDR, and the institutions related to literature and publishing industry.

MINISTRY FOR PUBLIC EDUCATION

Fritz LANGE, formerly chairman of the Central Commission for State Control, was given the post of Minister for Education in the GDR on 16 November 1954. Immediately after he took office the "New Course" in the school system which had been embarked upon in June 1953 came to an end. The measures which he took in the first two months in office indicate that the third step in the school reform is under way. Measures to be carried out are as follows:

1. Strengthening of the political-ideological schooling of teachers for the general schools
2. Execution of all instruction in terms of the political-ideological goals of the "German Democratic Schools"
3. Increased participation of worker and peasant children in the high schools
4. Consistent furtherance of Sorbic schooling
5. Furtherance of the instruction in Russian and educating qualified Russian teachers
6. Improvement of education for teachers in the middle grades (note: ages 10 - 14 are most formative years)
7. Further reorganization of the High Schools

Goal of these measures is to bring into harmony the demands for the building of socialism with the school curriculum and to adapt the organization of the school with the demands of a peoples economy.

IWE, 21 Jan 55

4th GDR Cabinet Meeting on 9 Dec 54 Re: Criticism of GDR Government Organs by Otto GROTEWOHL.

"According to the 1954 national economic plan 79,400 teachers were to be employed, as of 15 Sep only 78,859 were employed; during the 1953/1954 school year, 6,539 teachers left their profession for other jobs, mainly in school administration. The fact is that we have expended a good deal of money in the development of new teaching personnel. The teachers then simply change their professions, after they have caused the state to expend large sums of money in training them. The further education of present teachers has been very poorly handled."

UNIVERSITY FOR PEDAGOGY
(POTSDAM)

The peculiar position of the University for Pedagogy in Potsdam was a result of its two-fold subordination. As a training institution for Oberschule teachers, the University was administratively subordinate to the Ministry for Peoples Education, whereas, as a university, it was subordinate to the Ministry for University Affairs. This split responsibility was unfavorably reflected in the payment of salaries to the faculty, but it also gave the faculty leeway in the organization and planning of the curriculum.

Structure and Organization of the University for Pedagogy

The following institutes were part of the University:

- A. Philosophic-Historical Department Prof. (fnu) MEIER
 - 1. Historical Institute
 - 2. Slavic Institute Dr. (fnu) LOKYS
 - 3. Germanic Institute Prof. (fnu) HADERMANN
 - 4. Anglican Institute

MINISTRY OF FINANCE (cont'd)

I. Deutsche Noten Bank (cont'd)

Note: This section deals with the claims on loans, shares and other outstanding debts, from before 1945, on nationalized banks in the GDR. Recognized claims are devaluated to the rate of 10.1 and a "Sperr-Konto" is opened at the bank for the concerned person. The payments, in small percentage, will start in 1955. It was planned to dissolve the office in December 1954, but due to the large amount of work on hand it will probably not be dissolved until after Apr 55.

- g. Cipher and Code Department (22 Josef KUNZ (SED) (22
- h. Foreign Affairs Department (Abteilung
Auslands Sekretariat) (22 Gottfried WAGNER (SED) (22

Note: This section deals with the administration of foreign currency for the use of the ZK and the SfS.

- i. Foreign Information Department (22 Gerhard TANK (SED) (22

Note: Section deals with the evaluating of West German and foreign newspapers.

- j. Internal Security Department

Saale
 - (5) Liquors in Berlin

MINISTRIES concerned with production and distribution are to have committees formed within them which are to be concerned with seeing that circumstances resulting in the production of unsaleable goods are abolished and that unsaleable goods already produced are disposed of. These committees are responsible to the Central Government Committee which is subordinate to the Presidium of the Council of Ministers. Its exact subordination within the Ministry is not known. In all probability it is not subordinate to anyone with the Ministry itself. The members are as follows:

- 1. A Deputy Minister

REORGANIZATION

Rau has ordered a reorganization to go into effect 1 Jul 55. Under this reorganization the Ministry will have three principal divisions:

- a. Main Department for Heavy Industry, subordinate to a deputy minister and combining both the import and export aspects of heavy industry.
- b. Main Department for Light Industry, subordinate to a deputy minister and likewise with jurisdiction over both import and export matters.
- c. A Main Department for Commercial Policy, subordinate to a deputy minister, and dealing exclusively with matters of commercial policy.
- d. It has been reported that the above departments will be headed by STAIMER, HUETTENRAUCH, and WEISS, but beyond a rumor that STAIMER will direct the Main Department for Light Industry, nothing has been announced as to which deputy minister will head which department.

The reorganization placing import and export under a single responsible hand, is expected to lead to the one complementing the other.

Source 19

Kollegium is composed of the Minister, his State Secretary and Deputies plus the heads of the Main Departments (13).

CHAMBER FOR FOREIGN TRADE (KFA)
(Berlin NW7, Unter den Linden 40)

Formed 1 Jan 53 by government decree. It was called into being, to facilitate GDR exports to capitalist markets which, it was thought, would be more inclined to enter into contact with a "chamber of Commerce" than with a government owned trading corporation. Although according to its statutes, the Chamber is only supposed to act as a link between the DIA's and capitalist firms abroad, it often actually trades on behalf of DIA's unofficially. Although in theory the chamber is a non-governmental organization, in practice it is controlled by the Ministry for Foreign and Internal German Trade, since all members of the praesidium owe allegiance to its Minister. At the 171st meeting of the GDR Cabinet on 30 Sep 54 a decision was made which makes the State Secretary for Internal Affairs responsible for: the control of implementation of the decision within all state organs and administrations of the nationalized industry; the evaluation of all "Nomenclature Functionaries" whose employment is to be approved by the Council of Ministers or the Presidium of the Council of Ministers; exercise of his right to vote in cases involving violations of the principles of cadre policy within all state organs and the nationalized industry.

Source 5

Functions of the State Secretariat for Internal Affairs

I. Main Department for State Property

Concerned with requisitioned property within the GDR.

II. Main Department Archiv Matters

Controls all public Archives within the GDR.

III. Main Department Cadre

Controls personnel administration of all leading officials of the GDR government and Peoples Owned Economy, and maintains plans for governmental structural organization.

IV. Main Department Surveying and Cartography

Has its own map printing office within the building of the State Secretariat.

V. Department Population Policies

Referat Transport - Is concerned with transports of PWs and specialists, etc. from USSR, VIETNAM, and CHINA, and deals also with ex Foreign Legionnaires returning to the GDR, who have completed duties or have deserted from service.

Referat for Bringing Together of Families - Concerned with entry into the GDR of persons resident in Poland who are joining near relatives for permanent duration.

Referat for Moving Goods - Controls Bezirk offices which deal with applications of persons wishing to move personal belongings to Western Germany. Liaison is maintained with the GDR Amt fuer Kontrolle des Warenverkehrs.

~~CONFIDENTIAL~~

Functions of the State Secretariat for Internal Affairs (cont'd)

Referat Elections - Concerned with major elections within the GDR. Employees of this Referat are loaned regularly to other Referat during slack periods of work.

Referat for Legal Status (Personenstandswesen) - Controls the work of the various "Standesaemter" and provides them regularly with statistics from the "Wehrmachtsanskunftstelle" in West Berlin.

Referat for Social Questions (Gesellschaftsfragen) - Concerned with the political surveillance of churches, sects, and religious meetings, etc. Operates in direct conjunction with the State Secretary and liaises closely with Department State Administration of the SED CC.

Referat for Seeking Missing Germans - Concerned with notifications of missing persons and the examination of declarations of death handled by the "Amtsgerichte."

Within the near future Department for Population Policies is to be given the status of a Main Department.

A State Secretariat Collegium is in existence and consists of the State Secretary, all Main Department and Department chiefs, and the BGL and SED Party group. Meetings are held on Fridays of each week.

CONFIDENTIAL

STATE SECRETARIAT FOR THE ADMINISTRATION OF STATE RESERVES

Purposes:

1. To provide reserves of materials for the event of a sudden expansion of the armed forces.
2. To provide large stocks of food for use in the event of a crisis.
3. To hold reserves to meet a possible catastrophe.
4. To be in a position to provide supplies of goods in the event of economic crises.

Until Jun 53, the main objective was to cover the first two contingencies.

Production destined for the State Reserves was given priority over all other consumers, except for the Amt fuer Reparationen (which was dissolved on 31 Dec 53) and the KVP.

Withdrawal of goods from State Reserves has to be authorized by the Presidium of the Council of Ministers, by the Minister President or by his deputy.

Erzeugnisse)

COMMITTEE FOR THE PROMOTION OF GERMAN TRADE

Item 1: ADN on 14 April reported that about 200 businessmen from both parts of Berlin attended a meeting on 13 April convened by the above committee. They asked that the offer extended by the East Berlin city government to the West Berlin senate concerning a supplementary trade agreement for 200 million units of accou be accepted. The chairman of the East Berlin State Planning Commission DUSCHECK discussed the importance of the offer for the economic life in Berlin. Report added that no political string would be attached to the offer. To meet the demands of the West Berlin businessmen, the committee would consist of equal numbers of East and West people. In fact the East had no objections if the West had a majority of the committee. It (the committee) was to start operation immediately. The presidium was instructed to look after the interests of Berlin business circles in dealings with the West Berlin senate and the East Berlin city government. (a-

STATE SECRETARY FOR UNIVERSITY MATTERS (cont'd)

UNIVERSITY FOR PEDAGOGY

(POTSDAM)

The peculiar position of the University for Pedagogy in Potsdam was a result of its two-fold subordination. As a training institution for Oberschule teachers, the University was administratively subordinate to the Ministry for Peoples Education, where as, as a university, it was subordinate to the Ministry for University Affairs. This split responsibility was unfavorably reflected in the payment of salaries to the faculty, but it also gave the faculty leeway in the organization and planning of the curriculum.

Structure and Organization of the University for Pedagogy

The following institutes were part of the University:

- A. Philosophic-Historical Department Prof. (fnu) MEIER
 - 1. Historical Institute
 - 2. Slavic Institute Dr. (fnu) LOKYS
 - 3. Germanic Institute Prof. (fnu) HADERMANN
 - 4. Anglican Institute
- B. Natural Sciences and Mathematic Department Prof. (fnu) HAUSER
 - 1. Mathematics Institute
 - 2. Physical Institute Prof. (fnu) PICHT
 - 3. Chemical Institute
 - 4. Biological Institute Prof. (fnu) MUELLER-STOLL
- C. Rector 25X1A6c Prof. Arno MUELLER

Source: [REDACTED], F-2, 26 Nov 54 filed in Deutsche Paedagogische Zentralinstitut (DPZI) folder, which is behind the Ministry for Education folder.

Note: Could not determine whether or not this is identical with the DPZI or exactly how it is subordinated.

GDR DISTRICT AND KREIS COUNCIL JURISDICTION EXTENDED

1. Chiefs Administrations internal affairs in Districts and Kreise will be elected into the District and Kreise Councils as regular members, and their Administrations will become part Councils. Kreise Administrations for internal affairs will have following offices: (A) All-German Activities (B) Population Policy (C) Real Estate Records (D) Social Welfare Problems (E) Printing Licenses (F) Classified Documents.

2. Departments District Council for Agriculture and Forestry, Machine Tractor Stations, and Nationalized Farms are merged into one Department.

3. A section for State and cooperative trade will be established within Department for Trade and Supply District Councils. District Administrations State Retail Trade (HO stores) will be dissolved.

4. Trade inspections will be subject to control on both Central and District level.

5. Industrial Ministries have to ascertain in conjunction with State Secretariat for local economy which economic enterprises, presently under Central GDR government control, can be placed under jurisdiction local Councils.

CONFIDENTIAL

4th GDR Cabinet Mtg on 9 Dec 54
Otto Grotewohl, dated 17 Jan 55

Deficiencies in cooperation between the central state organs and the GDR Districts and District Councils:

"... The greatest deficiency in the work methods of the central state organs is that through false application of the idea of the centralization of the work of state organs, they have taken over in increasing measure, the duties of the special departments of District and Kreis Councils, of the local organs, and in some cases, executive power itself. Local initiative has been crippled by this, thus retarding the inclusion of the laboring classes in the work of the implementation of state duties.... The ministries and State Secretariats are not the direct superiors of the specialized departments within the District and Kreis Councils.... These specialized departments are supposed to work under the responsible management of the councils; they are not an extension of the ministries. Naturally this false practice has led to the point, that instead of the operative aid, that the ministries should provide to these offices, the circular distribution system has been inaugurated, which has led to the results with which we are all acquainted. This must be overcome. When we do not overcome this "circular" economy, then the District and Kreis Councils will not be free for operational work, which is what they are there for.... We must seriously discuss this question in our Kollegium meetings and make clear to the chiefs of our Main Departments which mistakes now exist which must be done away with. That means practical supervision and control.... The central offices, ministries, and state secretariats must have it impressed upon them that they are not the direct superiors of the Departments in the District, rather that the District Councils are responsible for the implementation of all activities within their districts.... that we can, in no circumstances, undermine the authority of the District Councils by bypassing them to work directly with the special offices in the districts."

29. Department for West German Work

- | | |
|----------------------------|--------------|
| a. Chief | Paul WERNER |
| b. Special Representatives | Heinz BRANDT |
| | Martin HELAS |

* There is no clear description of these two departments. They may today be amalgamated into one department for the function of internal security and another department for the function of liaison with the Sfs and KVP. Source 23 states that Department "M" is an expanded version of the former counter-intelligence Referat (Abwehr). It is reported to work closely with the Sfs and KVP and is at present concerned with recruiting campaigns for the KVP with particular emphasis being placed on the recruitment of officer candidates. The same source (23) claims Wilhelm ZAISSER is employed in this department to do counter-intelligence work, and that Franz DAHLEM is employed on the training of western specialists and experts.

H. Notes on DWV

1. Functions of the German Merchandizing Association -- DWV (Deutsche Waren-Vertriebsgesellschaft)
2. The DWV is not a nationalized enterprise like most corporations of the GDR, but enjoys the status of an outwardly independent company, indicated by the use of the term "Gesellschaft" in its title meaning that there are individual owners or co-owners who jointly share in the firm's liabilities and profits. It is allegedly owned by the SED with such leading party functionaries as Wilhelm PIECK, Walter ULBRICHT, and Otto GROTEWOHL figuring as corporation partners. It hires approximately 520 persons.
3. Main Department NEUEN is allegedly the legalized center for illegal East-West trade conducted by the SED. It is staffed with specially trained and selected SED personnel. It is believed that it is involved in the West German blackmarket in coffee, cigarettes and foreign currencies and is further believed to be responsible for house to house sales of "genuine British Clothing and Shirting Materials" and "Oriental Rugs," all manufactured in Chemnitz of the cheapest Soviet Zone materials. The profits of the Main Department NEUEN which has a staff of approximately 80 persons, are estimated to exceed many times the combined profits of the other Main Departments of the DWV. This Main Department is not administered by Main Department Administration the way the rest of DWV is.
4. Polygraph-Export has eight sales divisions catering to the entire western world. It has a large number of independent sales representatives who buy the Polygraph products on their own accounts on the basis of a yearly minimum buying contract with the DWV. Since these representatives are not buying and selling on a commission but in their own names, the final customers of Polygraph Products are not known to the DWV.

GST

SED CONTROL

Ist Secretary Berthold receives his directives on policy from an Abteilung "M" of the SED CC. Informant is unable to state the function of Abteilung "M" but names its two leading personalities:

(fnu) ROEBELIN
Walter BORNING

FINANCE

Prior to Jul 53 the GST drew funds from the Ministry for Interior. (KVP Administration for Finance.) As a result of the events of 17 Jun 53, however, policy was changed and since then the GST has been drawing funds directly from the Ministry for Finance.

One Hauptreferent Bruno HEISE, approximately 64 years old, was subsequently appointed by the SED CC to the Ministry for Finance to administer funds going to the KVP and GST. HEISE does not belong to any specific department of the Ministry.

Funds are drawn by the GST once monthly around the 23rd.

For the year 54 the GST is drawing an allotment of slightly under 76,000,000 DMO from the Ministry and has a planned total income of approximately 4,000,000 DMO from membership subscriptions. Planned total expenditure for this year is approximately as follows:-

Building and repair	8,000,000 DMO
Weapons and equipment for training	38,000,000 DMO
Salaries	20,000,000 DMO
Administrative necessities	24,000,000 DMO

At the time of Informant's defection the financial plan for the year 1955 had not been commenced. Total amount of funds to be allotted had not yet been fixed but Informant was told by HEISE that this would be considerably less than 1954 and would probably be around 55,000,000 - 58,000,000 DMO.

Source: 1

CONFIDENTIAL

GST (cont'd)

GST AND PARA-MILITARY TRAINING

A deliberately arranged series of sporting competitions and paper chases on motor bicycles between the KVP and the GST are being organized in order to encourage relations between the 2 organizations and to induce a desire to join the KVP.

A second entry of GST members will be joining the Officer Training Course at Buckow in mid-October.

The GST is the sole source of supply of new officer candidates for the Sea Police. After leaving the GST they enter the Sea School at Rechlin, which is not subordinate to GST Neustrelitz, but directly under the control of the Central Committee of the GST. After preliminary training they then join the School ship "WILHELM PIECK."

CONFIDENTIAL

"GROSSCOURTH COMMITTEE"

The "Grosscourth Committee" which has existed for five years in East Berlin was told at a meeting called by Albert Norden that it was to become a counterbalance to the "Free Jurists Committee" in West Berlin. It is to investigate all cases in which a suspicion exists that there was a crime against humanity.

Members

Dr. Anneliese Grosscourth, M.D., President, no political affiliation, living in West Berlin, practice in East Berlin

Prof. Dr. Steinrueck (Humboldt University)

Liselotte Otting (DFD)

Fritz Beyling (Press Office)

In December 1954 work among women, at the instigation of Moscow, was intensified and the program is to strongly emphasize work against the Paris-London agreements. July 1 - 3, 54 the Fifth Federal Congress (Bundeskongress) was held. At this congress it was decided to establish a Department for "Landfrauen" to be under the Bundessecretary for Agitation. At the same congress it was decided to speed up the founding of a Department "Women and State." As yet it has not been organized. It will probably be placed under the Bundessecretary Organization, Instructor, and Kader. This was deemed necessary because of the extraordinarily unsuccessful cadre work within the DFD.

The DFD is supposed to make every effort to come closer in contact with all women in the Soviet Zone and to unfold a program among them to increase production, improve trade, collect old materials, help in rebuilding. The week of 1 - 8 March 55 is to be a "Fighting Week on the Occasion of the 45th Anniversary of the International Women's Day." This celebration is to emphasize production contests and a very strong recruitment of women for the DFD.

Work in Western Germany is allegedly to be strongly intensified.

SBZ Archiv - 20 Jan 55

It is also noteworthy, in connection with the development of Women's work in the GDR, that the department for Women of the SED Central Committee, originally an independent department, ranking with other executive departments, was first subordinated to the LOPM department after the riots of 1953, and then again re-granted its independence as a separate department within the SED within the past two months.
